AUTUMN PLANTING

Rhododendrons see Pages 8 and 9.

Evergreens, Trees and Shrubs
in the best varieties and with
Special Prices for Fall 1933

(((KELSEY NURSERY SERVICE
NEW YORK CITY

We can make immediate shipment of Evergreen stock—from now up to October 1st with perfect safety. Balled and Burlapped stock can be shipped all year round. On Deciduous varieties, the best shipping time is from late September to late November. Orders will also be gladly accepted now for delivery next spring if desired.

KELSEY NURSERY SERVICE

1. We furnish high quality stock. Kelsey Nursery stock is grown where it grows best; always of course, with regard to shipping convenience. Of more than seventy nurseries with over twenty thousand acres of stock we select the nearest nursery growing the material of the quality and grade you may want.

2. We furnish our stock at the lowest prices made possible by mass production. Prices of nursery stock vary greatly. One nursery grows stock on land worth, say, \$4,000 or \$5,000 per acre. The stock is no better than that grown at a nearby nursery where land is worth \$400.00 per acre. Nature has no partiality in this respect. We are, therefore, enabled to sell excellent stock at very low prices.

3. We are an entirely responsible source of supply. Established Fifty Years ago, in 1878, we still have among our customers many who have been patrons for forty years or more. In all our dealings we are always willing to make things right on any errors or just causes for complaint.

4. Our Guarantee—Stock to be in good condition when furnished. We will, however, replace any and all losses at half price.

5. Scarce and rare varieties: Why look through a dozen nursery catalogues for them? Send us your list and we will quote promptly. This Short Guide is necessarily confined to standard varieties, but with our facilities we can furnish almost any variety or size grown in the United States.

6. The policy of this Company is to make and keep good will by careful and prompt service.

PRICES—net, packing at cost. Five will be supplied at the 10 rate, 25 at the 100, and 250 at the 1000 rate.

Claims for errors or shortage to be made within ten days.

Young Aristocrats (Evergreens)

UNUSUAL and rare varieties . . . true to name because they are mostly grafted . . . Easy to grow because they have already passed a season out-of-doors. Some Winter protection is desirable, but no other special treatment. Balled and Burlapped for still easier handling. (Please remember that Dutch burlap is used and can be planted without removing from the plant.) This is an amazing opportunity to plant rare and delightful evergreens, trees and shrubs at little cost.

Cryptomeria Lobbi Compacta

15 to 20 feet. Picturesque, narrow and compact column. Rich bronze in Winter. This is unlike any other hardy evergreen in appearance. The Lobbi variety is much harder than the ordinary Cryptomeria. Zone V.

	(10)	(100)
B. & B. 3 to 4 feet.....	\$16.00	\$150.00
4 to 5 feet.....	25.00	200.00

Pfitzer's Juniper

GRAY'S BLUE COLUMN JUNIPER

(New) introduced 1932 for the first time to horticulture. Zone IV.

Juniperus communis
GRAYII.

(Plant Patent
No. 54)

A quick grower, a foot or so a year when young; reaching a height of eight feet or more. The original tree is now seven feet high and only fifteen inches through. Hardier than Irish Juniper. Long, striking needles of silver blue.

Originator: W. R. Gray, of Virginia.

2 to 2½ feet.....	3.50	33.00

Young Aristocrats (Yew and Hemlock)

JAPANESE YEW

Japanese Yew (*Taxus cuspidata*). V
 The most common form. A spreading bush, about twice as wide as high. Very hardy. Responds eagerly to shearing as for a hedge, although the upright form is better for this purpose.

- 12 to 15 inches.....\$1.00
- 15 to 18 inches..... 1.25
- (Larger sizes available at higher prices.)

Dwarf Japanese Yew (*Taxus brevifolia* or *nana*). V

Extremely slow growing and with denser, shorter needles than ordinary Japanese Yew. The one finest rock garden specimen—picturesque form.

- 10 to 12 inches.....\$1.00
- 12 to 15 inches..... 1.25
- 15 to 18 inches..... 1.50

Improved Japanese Yew (*T. cuspidata intermedia*). V

A cross between the Japanese and dwarf Japanese.

- 12 to 15 inches.....\$1.00
- 15 to 18 inches..... 1.25
- 18 to 24 inches..... 1.50

Upright American Yew (*T. Canad. stricta*)

Here is a worth while novelty. Dense ascending branches give this hardiest of all Yews a new shape and new uses. II (Each) (10)

- 12 to 15 inches.....\$2.00 \$15.00
- 15 to 18 inches..... 3.00 25.00

VERMEULEN'S YEW (New)

A vigorous upright pyramid with foliage like the "brevifolia"—dark and heavy. Here introduced for the first time to horticulture. The

type plant is 5 feet high and 2½ feet at the base, well proportioned. The distinct form of branching may be seen from the small specimen pictured. It is 12 to 15 inches high, and offered in this size only at \$2.50 each, postpaid east of Mississippi.

Not prepaid:

- 15 to 18 in.....\$2.50
- 18 to 24 in..... 3.50
- 24 to 30 in..... 5.00

Small 2 yr. plants

- 8 to 12 in.
- \$5.00 for 10

JAPANESE YEW

 2 yr. grafts...\$.75 ea.

*Viburnum
 Rhytidophyllum*

Sensational New Hybrid Hollies (Every Plant Grows Berries!)

A WELL known Florida nurseryman and propagator has discovered and now introduces to horticulture a unique thing among hollies: It is an *Ilex opaca* bearing perfect flowers. This is botanically sensational, but aside from that it is no longer necessary for the gardener to have several holly trees planted together. One tree bears both male and female parts and every tree, therefore, is loaded with berries. The strain has been thoroughly tested and some large trees are growing nicely on Long Island. Hardy, presumably, in Zone V. Five named kinds are offered—grafted plants true to type. All heavy bearers:

- HOWARD—Medium sized red berries, heavily borne, large glossy spiny leaves. Upright grower.
 HUME 2—Leaves lighter green and the tree grows more spreading than Howard.
 LAKE CITY—Leaves like HUME but grows like HOWARD. Berries larger and lighter red.
 BAILEY—Like Lake City, but berries medium size dark red. Foliage dull green and spiny.
 TABER 3—Large dark red berries. Leaves dark green and spiny. Upright dense grower.

Two year old grafted plants, balled and burlapped } **\$2.50 EACH** } 18 to 24
 postpaid anywhere East of the Mississippi. } (All five for \$11.50) } inches

(Larger sizes, from 1½ feet to 4 feet available in same varieties at much higher prices.)

Hardy Hybrid Rhododendrons

The Hybrids are noted for the beauty, richness and large size of their flowers, and their variety of color. For these reasons they add greatly to the attractiveness of any Rhododendron planting. Bloom from May 1 to June 10 on Long Island.

- *Ignatius Sargent—(V)—Rose flowers.
- H. W. Sargent—V—Good red. Late bloomer.
- *Mrs. C. S. Sargent—V—Best bright pink.
- *Dresselhuys—V—Analine red. Fine.
- J. D. Godman—VI—Carmine.
- *Roseum superbum—VI—Good bright rose.
- *Roseum elegans—V—Rose-lilac. Dwarf.
- *Album elegans—V—Blush-white. Late.
- Old Port—VI—Plum color. Rich.
- *Kettledrum—V—Rich crimson.
- *Parsons gloriosum—V—Dark purple.
- Delicatissima—V—White. Pink edges. Late.
- Charles Dickens—V—Dark red. Brown spots.
- *Boule de Nieve—V—White dwarf. Earliest.
- *Caractacus—V—Deep crimson.

Any of the above 1 year grafts
8 inches, B. & B., \$1.00 each—any quantity.
*Also 2 yr., 10 to 15 inches at \$1.80 each.

- America—V—Deep red.
- Amphion—V—Clear pink. White eye.
- Catawbiense album—V—White native.
- Everestianum—V—Rosy lilac. Compact.
- Lee's Dark Purple—V—Purple.
- Pres. Lincoln—V—Lilac pink.
- Dr. H. V. Rutgers—V—Fiery red.
- Grandiflorum—VI—Clear rose.
- Purpureum elegans—V—Purple. Late.

The above 2 year grafts, 12 in., \$2.00 each.

Mixed Hybrid Seedlings of the above:

Assorted cars at proportionate prices.

MOUNTAIN LAUREL

(*Kalmia Latifolia*). IV

FK—5 to 8 feet. Shapely bush covered with white to pink bloom in June—attractive buds in May. Nursery grown.

	(Each)	(10)	(100)
12 to 15 inches.....	\$1.25	\$10.00	\$ 90.00
15 to 18 inches.....	1.50	14.00	125.00
18 to 24 inches.....	2.00	17.50	160.00
2 to 3 feet.....	3.00	27.50

Dainty Daphne

(*Daphne Cneorum*)

At the left is a photograph: But it cannot tell the beauty of massed blossom in May and again in September—it cannot portray the delicious fragrance that makes these plants a delight to own. To be coldly scientific—it is thoroughly hardy in our area; entirely evergreen; fragrant; grows to a height of about 12 to 15 inches and spreads to twice that in width; dense-growing and compact; thrives in any good soil, but much prefers a sunny location.

	(Each)	(10)	(100)
6 to 9 in. spread.....	\$.50	\$ 4.50	\$ 40.00
9 to 12 in. spread.....	.65	6.00	55.00
12 to 15 in. spread.....	1.00	9.00	75.00
15 to 18 in. spread.....	1.50	13.50	120.00
18 to 24 in. spread.....	2.00	18.00	165.00

We offer a special type. A dozen of them in a group will have at least some flowers every week of the Summer between May and frost. Zone V.

Deciduous Azaleas

THESE delightful ericaceous shrubs have a charm all their own. They are popularly supposed to be difficult to grow but nothing could be further from the truth. A few simple rules are required; that is all. First, obtain good healthy plants with a system of roots well developed and wrapped in burlap, nursery grown, such as we offer on this page. Second, have the soil loose and light, and third, it must be acid, the same as for Rhododendrons.

AZALEA MOLLIS

Azalea, Chinese (*A. mollis*). VI (V)

Flowers in shades of red, yellow and orange are produced in large clusters. A hardy variety. We offer mixed colors.

	(Each)	(10)	(100)
2 yr. seedlings.....			\$ 4.00
3 to 5 in. X.....	\$ 1.75		15.00

(Each)	
2 year seedlings.....	\$5.00
12 to 15 inches, B. & B.....	2.00

Evergreen Azaleas

THESE beautiful, mostly dwarf, shrubs are without a peer for both spring and year-round beauty. The varieties on this page are hardy north in the zones indicated, but occasional severe winters may blight the flower buds. Taking this fact into consideration there is still no dwarf evergreen so well worth planting. They are all included in three species:—Macranthum, Ledifolia and Obtusa (Kurumes). All make good pot-plants in the house.

KURUME JAPANESE AZALEAS

These are derivatives of *A. obtusum* and mostly hardy in Zone VI, though *Amoena* and *Kaempferi* are hardy in V. The most beautiful of evergreen shrubs. Bloom in April and May.

	(Each)	(10)	(100)

Sensational Rose News

IN ALL garden history the year 1932 will be remembered as the year of the first two hardy climbing roses of everblooming type. Nothing in nature can compare to them for sustained ornamental effect.

HARDY EVERBLOOMING CLIMBERS

BLAZE—(Patent 10)—An everblooming hybrid of Paul's Scarlet. Vigorous and free flowered. 2-yr. field grown, \$4.50 for two, postpaid.

NEW DAWN—(Patent No. 1)—Everblooming strain of Dr. Van Fleet. Fragrant shell pink flowers in profusion. A neat, clean-growing climber with shiny disease-resistant leaves. 2-yr. field grown, \$3.50 for two, postpaid.

RARE NEW ROCK GARDEN ROSE

We offer the exceedingly rare and charming Rosa Rouletii, discovered in the Alps in 1922. Very dwarf, not more than six inches high, it blooms continuously through the summer, starting in April. Flowers are bright rose colored. 4-inch pots, \$2.00 each, postpaid. (\$12.50 for ten, not prepaid.)

Kelsey's 1933 Dozen

SELECTED HYBRID TEA ROSES

Briarcliff—Silvery rose pink; double.
Columbia—Bright pink, sweetly scented flowers of exquisite shape and strong, stiff petals, deepening in color as they expand. Free flowering.
Dorothy Page-Roberts—Apricot pink; large petals.
Duchess of Wellington—A delightfully fragrant rose. Intense saffron yellow.
Etoile de France—Deep crimson with cerise red center.
Golden Ophelia—A yellow form of Ophelia.
Gruss an Teplitz—Rich scarlet shading to crimson. Vigorous; free bloomer.
Hoosier Beauty—Velvety crimson.
Kaiserine Augusta Victoria—Cream, slightly shaded lemon. Very fragrant.
Killarney—Flesh, shaded white, suffused pale pink. A lovely variety.
Killarney Brilliant—Brilliant pink, almost crimson. Very fragrant.
Killarney White.
Konigin Carola—Color a beautiful satiny rose; reverse of petals silvery rose.
Lady Alice Stanley—Beautiful coral-rose. A magnificent variety, nearly reaching perfection.
Lady Ashtown—Pale rose, shading to yellow at base of petals. Fine buds.

Lady Hillingdon—Deep apricot yellow; violet foliage; vigorous.
Lady Ursula—Flesh pink; large; tea scented; very free bloomer.
Laurent Carle—Brilliant velvety carmine. A robust and free blooming rose.
Los Angeles—Coral pink.
Mme. Edouard Herriot—Coral or brick-red. Greatly admired.
Mme. Caroline Testout—Beautiful silvery-rose. Excellent in every way.
Mrs. A. R. Baraclough—Long buds, light glowing pink, tinted salmon.
Mrs. Aaron Ward—Color Indian yellow, shading to lemon-cream at the edges of the petals.
Ophelia—Salmon-flesh, shading to rose. Grand.
Premier—Rich, dark pink flowers of full form, fine size, and pleasing fragrance, borne singly on stiff, almost thornless stems.
Radiance—Soft carmine-pink. Double; sweet-scented; free.
Red Radiance—A crimson sport of Radiance.
Souvenir de Claudius Pernet—The best and one of the few really yellow, with a pointed bud and glossy foliage.
Souvenir de Georges Pernet—Large brick-red buds, opening to pink.
Sunburst—Rich yellow, shaded copper and orange.

PRICE OF ABOVE HYBRID TEA ROSES

60c each, \$6.00 per doz.
\$45.00 per 100.
Other varieties quoted on request.

KELSEY'S 1933 DOZEN

Any ten of the above listed Hybrid Tea Roses—your selection. In addition we add FREE the following two outstanding Roses:

Talisman—Apricot shaded to yellow at base. Vivid coloring and vigorous blooming.
Pres. Hoover—Maroon, orange and gold. A novelty of contrasting color.

\$6.50

Postpaid

Exquisite Trees From the Orient

JAPAN and China have been particularly prolific in furnishing us beautiful flowering trees and shrubs that are hardy and seem to be ideally suited to the climate of Eastern North America. Very many desirable Oriental types are listed elsewhere, and many more gladly quoted upon request. The finest effect of flowering trees is only obtained by mass plantings, beautiful as they may be in single specimens.

Japanese Flowering Cherries

More and more every year the beautiful Japanese Cherries are coming into their own in American gardens and one has only to visit Washington in the Spring to find out why. The magnificent planting there was put in a comparatively few years ago. All hardy in Zone V.

These are among the very first things to bloom in the Spring and extremely choice and scarce. We have several other varieties available in limited quantities. A small tree, entirely hardy. And notice these prices.

Named Varieties—as listed below.

	(Each)	(10)
3 to 4 feet.....	\$1.50	\$12.00
4 to 5 feet.....	2.00	18.00
5 to 6 feet.....	3.00	25.00
Fugenzo (J. H. Veitch)—Double pink. Late.		
Naden (Sieboldi) (also called Kofugen)—Double pink.		
Kwanzan (Sekizan)—Double old rose.		
Shirofugen—Double white, pink shading.		
Yoshino Cherry—Single pink. Fast growth.		

A Weeping Cherry Two Years After Planting a Kelsey Six-Foot Specimen.

JAPANESE WEEPING CHERRY (Double)

Among the unusual trees comes this exotic, with delicate pendant branches clothed in pink at the first warm weather of Spring. It is hardy and grows easily, but like most pendant types prefers a position sheltered from heavy winds.

We offer strong heads on 6 foot stems ready to bear their first blooms this Spring.

	(Each)	(10)
1 yr. heads.....	\$2.00	\$18.00
2 yr. heads.....	3.00

Flowering Crabs (Malus)

These superb trees are effective for lawn specimens, but even more important when used plentifully in woodland and mass plantings, in the same way as Dogwood and Hawthorn.

There is a wide range of size and shape and color of bloom and the following list includes only a few of those we are in a position to furnish. All hardy in Zone V.

	Price Per Each	4 to 5 ft.	5 to 6 ft.
ARNOLDIANA—Semi-double, pink, early.....	\$.75	\$1.00	
ATROSANGUINEA—Brilliant carmine.....	.75	1.00	
BECHTEL'S—Very fragrant, double, delicate pink.....	.75	
CORONARIA—Blush-white flowers. Double.....	.75	1.25	
ELEYI—Purple to red foliage and blooms.....	.75	1.00

PRUNIFOLIA RINKI—Large pink flowers.....	.75	1.00	
PRUNIFOLIA ROBUSTA—Vigorous small tree. White.....	.75	1.00	
SARGENTI—White flowers, spreading habit.....	1.25	
SCHIEDECKERI—Double deep rose.....	.75	1.00	
SIEBOLDI (Toringo)—Blush-pink to white, makes fine hedge.....	.75	1.00	
THEIFERA—Blush-white. Small stiff branched.....	.75	1.25	

(Large quantities at special low prices.)

Young Aristocrats (Deciduous)

THE DOVE TREE

(*Davidia involucrata*). Zone VI.

The late Dr. E. H. Wilson wrote of the *Davidia* that it is "the most interesting and most beautiful of all trees which grow in the north temperate regions." The white flowers and their long pendulous bracts, when stirred by a light breeze, resemble huge butterflies or small doves fluttering amongst the bright green leaves. Blooms in May and June.

For the first time we can offer this exceedingly rare and beautiful tree in the following sizes:

	(Each)
12 to 24 inches, B. & B.....	\$10.00
2 to 3 feet, B. & B.....	14.00
3 to 4 feet, B. & B.....	17.50

The Dove Tree is one of the rarest and most sought after of specimens. It is very slow-growing, being a relative of our native Sourgum (*Nyssa*). Seeds of the *Davidia* are available at \$1.00 for one nut.

STEWARTA PENTAGYNA

This extremely choice and rare American native makes a handsome small tree with large showy white flowers in July and August and has bright green leaves changing in autumn to orange and scarlet. Very choice. Hardy in Zone V.

3 to 4 feet, heavy plants.....\$5.00 each

FLOWERING ASH (*Fraxinus ornus*)

Handsome round-headed tree to 50 feet. Showy white clusters of fragrant flowers in May and June. Hardy in Zone V.

5 to 6 feet, nice trees.....\$2.00 each

THE LONG-LOST FRANKLINIA

The *Franklinia* (*Gordonia altamaha*) is the rarest native American flowering tree. Found by John Bartram in 1790 and never found since, all specimens are propagated from the original single tree of Bartram's which has since died. A small tree to 30 feet with White showy flowers 3 inches across in August. Related to the *Camelia*, but hardy north in Zone VI.

12 to 15 inch plants,
postpaid\$3.00 each

THE REDBUD (*Cercis Canadensis*)

Why this glorious small native tree is not more generously used is a mystery. April and May sees the bare limbs covered with bright rose flowers, followed by large handsome leaves. Should be grouped with Dogwood. Zone V.

4 to 5 foot trees.....\$1.25 each
6 to 8 foot trees.....\$2.50 each

12 to 15 inch
Redleaf Japanese Maple

12 to 18 inch
Purple Beech

JAPANESE MAPLE (*Acer*)

We offer only true grafted types. They will retain their color practically all Summer, having been especially selected for propagating for that very reason. Makes a superb lawn specimen, or may be used for mixed planting in the shrub border, where its brilliant coloring makes a striking effect. Zone V. (Balled & Burlapped).

A. palmatum atropurpureum (Redleaved Japanese Maple)		(Each)
8 to 12 inches, 1 yr. grafts.....	\$.60
12 to 15 inches, 2 yr. grafts.....		1.00
15 to 21 inches.....		1.50
21 to 24 inches.....		2.50

A. purpureum dissectum (Cutleaved Red Japanese Maple)		
8 to 12 inches, 1 yr. grafts.....	\$.75
12 to 15 inches, 2 yr. grafts.....		1.00
Specimens, 12 to 18 inches, spread.....		2.00
18 to 24 inches, spread.....		3.00

White Fringe (*Chionanthus*). Zone V.

A tall growing shrub with lacy, snow white flowers which droop in panicles 4 to 6 inches long, and appear in May.

	(Each)	(10)
3 to 4 feet.....	\$1.50	\$12.00
4 to 5 feet.....	2.25	20.00

Purple Fringe (*Rhus cotinus*). Zone IV.

This shrub which is sometimes called Smoke Bush, is of medium size and produces fringe-like flowers, which when in full bloom has the appearance of a cloud of smoke.

	(Each)
2 to 3 feet.....	\$.75
3 to 4 feet.....	1.00

Young Aristocrats (Deciduous)

THE BEECH (Fagus)

Its smooth gray bark and delicate foliage are reminiscent of the Holly and Magnolia. Planted in groves and clumps it becomes a magnificent part of any estate. Single specimens on lawns are equally effective. The European types listed here are denser than the American species.

European Beech (F. Sylvatica). V

EGI—50 to 60 feet. A beautiful tree with fan-like branching, close and dense to the ground.

	(Each)	(10)	(100)
4 to 5 feet.....	\$3.50	\$33.00	\$300.00
2 to 3 feet.....	1.25	11.00	100.00

Purple Beech (F. Syl. Purpurea). V

Same as above, with rich red purple or copper leaves. Balled and Burlapped.

	(Each)
12 to 18 inches, 2 yr. grafts.....	\$1.00
4 to 5 feet.....	7.50

Fagus Pendula (Weeping Beech). V

Forms an immense fountain of green thirty to forty feet high. Balled and Burlapped.

12 to 18 inches, 2 yr. grafts.....	\$1.00
18 to 24 inches, 3 yr. grafts.....	1.50
2 to 2½ feet, B. & B.....	2.00
4 to 5 feet, B. & B.....	9.00

Purple Weeping Beech. V

8 to 10 inches, 1 yr. grafts.....	\$1.50
-----------------------------------	--------

Fernleaf Beech (Heterophylla). V

12 to 18 inches, 2 yr. grafts.....	\$1.00
------------------------------------	--------

CHARMING MAGNOLIAS

Great pure flowers thick on the bare branches of spring—the Magnolias are among the most beautiful of flowering trees. We offer these hardy kinds. Balled and burlapped. (Zone V.)

Halleana stellata—April 15. White.

	(Each)
10 to 12 inches, 1 yr. grafts.....	\$1.00

H. Stellata rosea—April 15. Rose.

10 to 12 inches, 1 yr. grafts.....	1.25
12 to 18 inches, 2 yr. grafts.....	2.00

Consipicua—April 20. White.

15 to 21 inches, 2 yr. grafts.....	1.50
------------------------------------	------

Soulangeana—April 20. Pink and white.

10 to 12 inches, 1 yr. grafts.....	1.00
12 to 18 inches, 2 yr. grafts.....	1.25
3 to 4 feet specimens.....	7.00

Soul. Lennei—May 1. Red and white.

10 to 12 inches, 1 yr. grafts.....	1.00
12 to 18 inches, 2 yr. grafts.....	1.25

Soul. Nigra—May 15. Purple and white.

10 to 12 inches, 1 yr. grafts.....	1.00
------------------------------------	------

Flowering Dogwood

FLOWERING DOGWOOD (Cornus)

Spring would lose much of its beauty were it not for this species. The large showy flowers in massed effect make a sight never to be forgotten.

Note that we can furnish small sizes as well as large. This is true of all other varieties on these pages. They are listed and priced in the classified list of small stock (page 26), under the heading "Deciduous Trees." Small sizes of these beautiful flowering trees can be used to obtain a massed effect at low cost, but which in a few years will make as effective a planting as the larger sizes for more immediate effect.

White Flowering Dogwood (C. Florida). IV

DIJ—20 feet. Covered with white blooms in May. Crimson leaves and berries in Autumn.

	(Each)	(10)	(100)
2 to 3 feet.....	\$.80	\$ 4.00	\$ 30.00
3 to 4 feet.....	1.00	5.00	40.00
4 to 5 feet.....	1.50	6.75	50.00
6 to 8 feet, B. & B....	3.50	20.00	150.00

Red Flowering Dogwood. IV

Same as above with Pink blooms.

	(Each)	(10)

Shade Trees for Streets

GOOD shade trees in the proper sizes have been scarce and dear. This season we offer a good supply of fine well transplanted trees in the best varieties. The prices represent distinct bargains. In most cases we can make shipment either from the East or the Middle West, representing a saving on freight.

ACER (Maple)

Norway Maple—Zone IV.

Handsome, dense favorite.

	(Ea.)	(50 or more)
6 to 8 feet.....	\$1.50	\$1.10
8 to 10 feet.....	2.00	1.30
10 to 12 feet (1½ to 1¾").....	3.00	2.00
12 to 14 feet (2 to 2½").....	4.00	2.75

Schwedler Maple—Zone IV.

Leaves red in early summer—then purple.

8 to 10 feet.....	3.00	1.50
1½ to 2 inches, caliper.....	2.75
2 to 2½ inches, caliper.....	3.50

Oriental Plane—Best of All

This charming species is one of the few trees really adapted to succeed under city conditions. Poor air—even smoke and gases—and difficult soils seem to affect the Plane Tree very little. This fact is important by itself, but in addition the Plane is a beautiful specimen, with a neat dense head and charming shape even while young. The two-toned bark and handsome dark green leaves are known and prized wherever streets are planted with trees. We have a block of 2000 of these trees running from 1¼ to 2 inches in caliper, twice transplanted, well branched and straight. These we are offering at almost give-away prices for the quality:

1¼ to 1½ inches.....	\$125.00 per 100	1½ to 1¾ inches.....	145.00 per 100
1¾ to 2 inches.....	\$175.00 per 100	2 to 2½ inches.....	225.00 per 100

(And special prices quoted on lots of 200 or more)

Here Are Hurry Trees

THE CHINESE (OR SIBERIAN) ELM— ULMUS PUMILA—Zone III

WHERE screen or shade is wanted in a hurry—and yet permanent screen and pleasing shade—page the new Chinese Elm. Phenomenal tales of its speedy growth and hardiness are told and most of them strangely enough seem to be true. It has few troubles. The only one seems to be a distaste for heavy or poorly drained soils. It grows slowly on such land, and does best on sandy or dry situations. Each tree, upon planting, should be trimmed back. These trees offered below are grown for one season or more in New England and were raised from hardy North China Seed.

There is a distinct advantage in having trees of this species hardened off in the Eastern climate. They will take hold much more briskly and give less trouble. The tree is shapely and seems to be immune to nearly all the common diseases of trees. With the recent invasion of Dutch Elm disease this immunity is a distinct factor. The wood is firm and hard and quite tough. In Siberia where the *Ulmus pumila* is native, it is used for trimming and shearing for hedges and formal effects, for it is a bushy compact grower.

POPLARS AND WILLOWS

We have many varieties to offer, but the recent State quarantines make it desirable that you write for our very low prices, depending on what State you are in. Please advise how many and what kinds you are interested in. These trees are extremely rapid in growth and very useful for many purposes.

HAWTHORNES (*Crataegus*)

The Hawthorns are small, shrubby trees with beautiful glossy green foliage. Showy blooms are produced in the Spring and in the Fall they are very attractive with brilliant foliage and fruit. Zone IV.

Paul's Scarlet Hawthorn (*C. oxycantha splendens*)

Very double deep crimson flowers with a scarlet glow. A small tree of fine habit.

Pink Hawthorn (*C. oxycantha rosea*)

Pink flowers in May.

White Hawthorn (*C. oxycantha alba*)

Fragrant white flowers in May, and bright red fruit in the Fall.

We offer the above varieties as follows:

	(Each)	(10)	(100)
3 to 4 feet.....	\$1.50	\$12.50	\$100.00
4 to 5 feet.....	1.75	15.00	110.00
5 to 6 feet.....	2.00	17.50	150.00

MOUNTAIN ASH (*Sorbus*)

American Mountain Ash (*S. americana*)

Brilliant clusters of bright red berries in the Fall. Hardy in Zone II.

	(Each)	(10)
4 to 5 feet.....	\$1.00	\$ 8.00
5 to 6 feet.....	1.50

European (*S. aucuparia*). Zone III.

A very attractive small lawn tree, with graceful, compound leaves which turn orange red in the Fall. Clusters of scarlet berries are borne in great abundance from July until Winter.

	(Each)	(10)
6 to 8 feet.....	1.50	12.00
8 to 10 feet.....	2.00	18.00
10 to 12 feet.....	3.00	27.00

Weeping (*S. aucuparia pendula*). Zone III.

An umbrella-shaped variety with graceful drooping branches, resembling the Weeping Mulberry in habit.

	(Each)	(10)
2 year heads.....	\$3.00	\$27.50

Honest, Reliable Fruit Trees

THE special sizes here quoted are selected for best results. The list of varieties includes only the very best of both new and old types. All trees are grown in the North and are hardy and full of vitality. They are not to be compared with cheap Southern grown stock. Ten assorted fruit trees at the ten rate. Larger quantities at very low prices quoted upon request.

APPLES, Standard (Zone III)

	(Each)	(10)
6 to 7 feet.....	\$.75	\$ 6.00
8 to 10 feet.....	1.50	12.00

	(Each)	(10)
6 to 7 feet.....	\$.75	\$ 7.00

Sweet—Bigarreau, Black; Black Tartarian, Black; Gov. Wood, Red on white; Windsor, Dark; Yellow Spanish, White.
 Sour—Early Richmond, Red; May Duke, Red; Montmorency, Red; Morello, Red.

PEACHES (Zone V)

	(Each)	(10)
5 to 6 feet.....	\$.50	\$ 4.50

Varieties: In the order of their ripening.

Greensboro—White with red cheek.
 Carman—White with red cheek.
 Mountain Rose—White and red.
 Champion—White and red.
 Crawford Early—Yellow.
 Belle of Georgia—White with red cheek.
 Old Mixon—White with red cheek.
 Early Elberta—Yellow.
 Rochester—Yellow.
 Elberta—Yellow.
 J. H. Hale—Yellow.
 Crawford Late—Yellow.

PEARS (Zone IV)

	(Each)	(10)
No. 1 Grade.....	\$.75	\$ 7.00

Anjou, Winter; Bartlett, Summer; Clapp's Favorite, Summer; Seckel, Fall; Sheldon, Fall; Beurre Bosc. 5 to 6 feet.....\$1.50 each

PEARS, Dwarf

	(Each)	(10)
4 to 5 feet.....	\$1.00	\$ 9.00

Anjou, Bartlett, Clapp's Favorite, Seckel.

New Hybrid Nut Trees

AT LAST we are able to offer our customers an opportunity to buy and enjoy the remarkable new hybrid nut trees. Hybridizers and experimenters have been working on this problem for years. Hardy types of both English Walnuts and Pecans are now available for the North. Delicious Black Walnuts with easily opened shells . . . Hybrid Hickories with haunting flavor previously unknown even to epicures . . . most amazing of all, these varieties will bear nuts as early as the third or fourth year after planting. The varieties we offer here have been thoroughly tested for some years.

BLACK WALNUTS —IV (*Juglans nigra*)

One of the finest nuts in the world. It is hardy in Canada and in Florida, growing well in any fertile well drained soil. But the grafted sorts grow faster and the nuts thinner shelled, with plump meat that comes out readily. The flavor is unique and is not lost in cooking (this can be said of no other nut). The new grafted varieties bear their first nuts sometimes in the second year after planting and commonly in the third to fifth year if the tree is properly fertilized.

Stabler has the thinnest shell. The meat falls out easily in halves or one piece and is of a rich mellow flavor. The tree makes a fine spreading specimen with unusually ornamental form and foliage.

Thomas is a really rapid-growing tree, hardy and easy to grow. The meat is attractive and tasty, but does not crack as easily as the Stabler.

ENGLISH WALNUTS—V (*Juglans regia*)

If these be grafted on Black Walnut roots, the wood ripens much sooner than otherwise. Hence, such trees can stand much colder weather and are now doing well in extensive plantings in New England and even Michigan.

Wiltz-Mayette is perhaps the best variety for all purposes. The shell can be cracked in the fingers. The meat is plump, white and not in the least bitter. It is a reliable bearer. The English Walnut requires a lime soil and where this is not natural, it is imperative that lime or crushed limestone be plentifully added to the planting soil. The first crop may be expected in three or four years. The nuts will keep prime for two years.

HYBRID HICKORIES

The Shagbark Hickory is a charming tree but the wild nuts are hard to crack and come into bearing very slowly. But these excellent hybrids inherit all the good points and eliminate the bad—for the nut has a thin shell and a flavor which must be experienced to be believed.

McAllister is a unique tree: Nearly as thin shelled as any pecan, but its flavor is that of the delicious wild shell-bark hickory. The nut is over two inches in length and is larger than any southern pecan. The kernel is plump and full, the largest in the *Hicoria* genus. It makes a wide spreading specimen with foliage resembling the pecan—a beautiful tree. V. Irregular bearer.

Burlington (also called Marquardt) resembles the pecan as to the nut. The tree is very easily grown, a rapid grower and extremely hardy. Does well in Minnesota. Very satisfactory tree and delicious flavor. Reliable early bearer.

*(Can furnish specimens guaranteed to have borne nuts last year at 50% extra)

HARDY NORTHERN PECANS (*Carya pecan*)—Zone V

The commercial pecan varieties originated in the South, but the ones we offer come from Indiana and Illinois originally. Some of the varieties are hardy in Canada and will bear in Southern New England and the lower Lake region. The quality of the nuts in these varieties is in every way the equal of commercial Pecans. They will bear in three to five years.

Busseron and Butterick are the oldest and best varieties. The differences in growth and quality of the nut are slight. It is very advisable to plant one of each kind so that they will cross fertilize.

BLIGHT RESISTANT CHESTNUTS—V

The Chinese Chestnut (*Castanea molissima*) is larger than the American and of fine flavor and sweet. It is so inured to the Chestnut Blight (which also came from China and is very destructive of our native species) that it may be planted with safety. The tree is not large—seldom growing above 40 feet. Now that the American Sweet Chestnut cannot be recommended for many parts of the country, this species amply takes its place so far as nut-producing is concerned. A steady bearer.

Chinese Chestnut (Mollissima)

	(Each)	(10)

. . . A Few of the Best Sorts of

MAY-FLOWERING VIBURNUM

V. Carlesii. Zone V

Resembling its namesake, the Mayflower, in fragrance and blossom this shrub is a favorite wherever it is planted. The flowers appear with leaves in early May. It is a rather low-growing shrub, of dwarf habit and is especially desirable in the garden or shrub border. We have this variety in large quantities and offer strong, well developed plants.

	(Each)	(10)	(100)
15 to 18 inches.....	\$.80	\$ 7.50	\$ 60.00
18 to 24 inches.....	.75	6.50	60.00
24 to 30 inches.....	1.00	9.00	75.00
2½ to 3 feet.....	1.25	11.00	100.00
3 to 4 feet.....	1.50	13.50	125.00

WINTERBERRY

(Ilex verticillata). IV

A very ornamental shrub with light green foliage and upright branches. Its bright scarlet berries are very decorative and remain on the branches until Mid-winter.

1½ to 2 feet.....	\$.50	\$ 4.50
2 to 3 feet.....	.75	7.00
3 to 4 feet.....	1.00	9.00

FEBRUARY DAPHNE

Daphne Mezereum. IV

A small hardy shrub blooming long before the leaves appear. The stems are closely set with deep red, fragrant flowers. Enjoys partial shade.

15 to 18 inches.....	\$1.00	\$ 9.00	\$ 80.00
18 to 24 inches.....	1.50	14.00	135.00

WEIGELIAS

Weigelia Eva Rathke. V

A remarkably free bloomer. The flowers which are a rich, reddish purple are very showy.

2 to 3 feet.....	\$.50	\$ 4.50	\$ 40.00
3 to 4 feet.....	.60	5.00	45.00

BEAUTYBUSH

Kolkwitzia amabilis. V

One of the finest of the newer shrubs, producing long sprays of graceful foliage. The flowers are a delicate pink, similar in shape to those of the Weigelia, but much smaller. Although a rapid grower, it does not flower profusely until it becomes thoroughly established.

	(Each)	(10)
2 to 3 feet.....	\$.60	\$ 5.00
3 to 4 feet.....	.75	6.50

NEW KOREAN SPIRAEA

Spiraea trichocarpa. V

One of the best of the new Spiraeas. It resembles the Spiraea Vanhouttei, but flowering a few weeks later it comes at a time when its show of beauty is much more useful. A thoroughly desirable variety.

	(Each)	(10)	(100)
2 to 3 feet.....	\$.40	\$3.60	\$30.00
3 to 4 feet.....	.50	4.50	36.00

INTERESTING COTONEASTERS

Rare and interesting Oriental shrubs with showy ornamental fruit and leaves. Any five of the following kinds, plants from 5 and 6 inch pots, shipped postpaid (E. of Mississippi) for \$6.50. Otherwise \$1.25 each, not postpaid.

Acuminata—V—(12 ft.) pink bloom. Red fruit.
Adpressa—V—Prostrate. Fruit bright red.
Apiculata—V—(6 ft.). Bright red fruit.
Dammeri radicans—V—Evergreen. Prostrate.
Dielsiana—(V) VI—(7 ft.). Scarlet fruit.
Francheti—VI—(10 ft.) Pink bloom. Orange fruit.
Perpusilla—V—Tiny bright leaves. Low spreading.
Microphylla—V—Evergreen (3 ft.). Red fruit.
Prostrata—VI—Evergreen (12 ft.) Red fruit.
Racemiflora soongarica—V—(8 ft.) White flowers.
Simonsii—V—Upright (12 ft.). Scarlet fruit.

The Sensational New Blueberries

For several years experts have been working on the improvement of the old-fashioned Blueberries. The results can no longer be ignored. Blueberries are now available up to three-quarters of an inch or more in diameter and the general run of the crop is several times as large as ordinary wild berries—to say nothing of delightful flavor, fine aroma and pleasant texture.

Rubel—Most dependable.
Grover—Finest flavor.

Jersey—Largest berries (new)
Katherine—Most beautiful.

The above two varieties 10 to 12 inches high at \$1.60 each delivered postpaid.

The above two varieties 10 to 12 inches high at \$2.50 each delivered postpaid.

Reforestation

THE surprising prodigality heretofore prevailing in forest destruction all over the country is at last arousing public opinion. There is rapidly growing and widespread interest now being taken both by private planters, National, State and Municipal Departments toward restoring as far as possible what has been irretrievably lost, due to the suicidal policy and wanton waste of our forests and the consequent depletion of our national timber resources.

Supplying all young stock in quantity for reforesting and for nursery planting on the most favorable terms is one of the important and well-known features of the **KELSEY NURSERY SERVICE**. That these facilities are more and more appreciated by past and prospective patrons is shown in our constantly increasing business.

It is, therefore, advantageous, especially where material quantities are required to get in touch with us before making purchases.

A complete list of young seedlings and transplants will be found in the following pages. But it by no means prices all the stock we have to offer. And in large quantities we are prepared to make very special low prices. Write us for prompt quotation on your needs.

Lining-Out and Forestry Stock

SEEDLINGS ("S")

Many varieties of evergreens are raised from seed until they are two or three years old. These very small plants must be handled with extra care. They should be planted about four inches apart in beds. The beds can be four feet wide and as long as is necessary—up to 100 or 150 feet. Here they are left two years and should be shaded by a lath screen, rested on posts driven into the ground. They are hand cultivated frequently if satisfactory growth is to be obtained. In the Autumn, mulch with dead leaves three inches deep to prevent frost-heaving. At the end of two years, they should be taken from the beds and treated as transplants.

TRANSPLANTS ("X")

Evergreens that have been moved from one position to another, or that have had their roots pruned, tend to throw out extra roots near the stem, forming a close compact ball of fibrous roots that can be easily dug up when the tree is ready for its permanent location. This thick root system increases the chances for success enormously.

Transplants under six inches are so small that they can best be handled in the same way as seedlings, except in reforestation plantings. But over six inches in height the transplant is sufficiently sturdy to be planted out in the open field in rows four feet apart, and a foot or more apart in the rows.

ROOTED CUTTINGS ("R.C.")

Many evergreens do not come true to type from seed. These are propagated by cuttings of branches rooted in sand. It is a difficult process, requiring months in a green-house under exact barometric conditions. In the case of the Yews, often two years is required. For this reason, cuttings are much more expensive than seedlings. They require the same care (for the first year) as seedlings, but once they have passed a Winter in the beds they can be treated as transplants, except for a few special varieties.

GRAFTS

Some trees which do not come true from seed will not even take root readily. These varieties are grafted on established roots of related species and when the graft is healed are perfectly hardy and can be treated as transplants. But during the first year, while the graft is healing, they must be carefully tended. Once a Winter is safely passed out-of-doors, the danger is over. For this reason it is best to buy grafted varieties one year old. Such grafts we list under the name of "Young Aristocrats."

FORESTRY

Transplants and even seedling of the hardier types **Spruce, Pine, Fir, etc.**—can be set out immediately in their permanent positions where a large acreage is to be forested or where a screen or mass effect is desired.

DELIVERY COSTS

These small trees weigh very little. They should always go by Express or Parcel Post. You pay these charges, which are seldom more than 10 or 15% of the value of the stock. We will quote delivered prices on your wants, if you want to be sure of the exact amount before hand.

SAMPLE BARGAIN POSTPAID OFFER:

We will ship one hundred trees of the varieties below for \$3.50.

Orders must be in even hundreds and the price includes cost of postage east of the Mississippi. Every tree is guaranteed to live for one year or will be replaced without cost. You may order from the following list as you wish to make up your hundred trees in units of exactly twenty-five of one kind. We cannot accept orders otherwise assorted. All the trees are 8 to 12 inches high and have been once transplanted.

Norway Spruce

White Spruce

Red Pine

White Cedar

Colorado Spruce

Balsam Fir

Englemann Spruce

Mugho Pine

XMAS TREE SPECIAL OFFER:

For those who plan to set out large plantations to grow Christmas trees commercially, we have selected the three best kinds and offer 12 to 18 inch transplants at the bargain price of

\$29.50
per thousand.

These three varieties:

Norway Spruce

White Spruce

Balsam Fir

Plant them large and save years of waiting.

WHAT SMALL EVERGREENS LOOK LIKE—

ARBORVITAE (*Thuja occidentalis*)

These photographs show four sizes priced as follows: 3-year-old seedlings, \$5.25 per thousand; 6 to 9 inch transplants at \$20.00 and 9 to 12 inch at \$30.00 per thousand.

RED PINE (*Pinus Resinosa*)

The above four different sizes are priced:—Three-year-old seedlings at \$6.00 per thousand; 3 to 6 inch transplants at \$11.00 per thousand; 6 to 9 inch at \$15.00 and 9 to 12 inch at \$20.00 per thousand.

Evergreens for Lining-Out and Reforestation

THE following lists are not complete. We can furnish many other kinds and in a greater range of sizes. If you do not see what you want, please write us for a special quotation. We sell 250 at the thousand rate and 50 at the hundred rate, except for seedlings under \$25.00 per thousand, where we cannot accept orders for less than 100 of a kind. Very special prices on large quantities. Write in your list for quotations.

"S" Indicates seedlings not transplanted.

"X" Indicates each transplanting.

ABIES (Fir)

Balsamea (Balsam Fir)

Its characteristic clean odor and stately appearance make this a desirable variety even without its well known value as timber. Ideal evergreen for wet land. Popular variety for Christmas trees.

NIGRA—

THE AUSTRIAN PINE

This variety of the Black Pine is perhaps the best of the hardy, fast growing kinds and succeeds in a wide variety of soil—even along beaches subject to the salt spray of the sea. It is much used as a windbreak in estates near the ocean, but is especially adapted for forestry planting.

Berries That Attract Birds

BY planting their natural food you can have your favorite birds with you all season. The table on this page gives varieties of trees and shrubs which by U. S. Government field observation are known to attract the more desirable birds. The total number of birds seen eating the fruit is given in the second column, except in a few cases where complete information is not yet available. Not only for attracting birds, but to keep them away from cultivated fields by providing natural food near at hand. For instance, a few Mulberry trees and Shadbush will prove a more attractive fare to birds than Cherry trees loaded with cultivated fruit in June. Write us for any detailed information you desire upon the subject. No obligation.

Shrub or Tree	No. Birds Attracted	Fruiting Season	Small Sizes for Quantity Planting (Per 100)		Larger, Branched Near-Bearing Sizes (Per 10)	
Amelanchier (Juneberry).....	40	May to Sept.	6-18"	\$10.00	2-3 ft.	\$ 8.50
Aronia (Chokeberry).....	13	All year	12-24"	6.00	3-4 ft.	7.50
Benzoin (Spicebush).....	17	Sept. to April	15-20"	8.50	3-4 ft.	7.50
Berberis (Japan Barberry).....	..	Oct. to April	12-15"	4.50
Celtis (Hackberry).....	40	All year	12-18"	4.50	5-6 ft.	8.00
Crataegus (Cockspur Thorn).....	33	Aug. to Mar.	8-12"	10.00	2-3 ft.	9.00
Crataegus Tomentosum.....	33	Oct. to April	10-15"	10.00
Celastrus (Bittersweet).....	Aug. to May	9-12"	6.00	2-year	4.25
Cornus (Silky Dogwood).....	86	July to Oct.	12-18"	8.25	3-4 ft.	5.25
Cornus (Flowering Dogwood).....	86	Aug. to Feb. 15	18-24"	8.25
Dirca (Leatherwood).....	..	May to June	12-24"	15.00	2-2½ ft.	15.00
Diaspyros (Persimmon).....	..	Aug. to Mar.	18-24"	4.00	3-4 ft.	12.50
Euonymus (European).....	..	Sept. to Mar.	8-12"	10.00	3-4 ft.	6.50
Black Huckleberry.....	35	July to Sept.	Clumps	10.00
Ilex (American Holly).....	45	Sept. to May	6-10"	12.00
Ilex (Black Alder).....	45	All year	6-12"	8.25	2-3 ft.	7.50
Juniper (Red Cedar).....	39	June to April	10-18"	18.00
Lonicera (Honeysuckle).....	15	All year	18-24"	5.25	3-4 ft.	5.50
Myrica (Bayberry).....	73	May to Aug.	4-8"	20.00	2-3 ft.	9.50
Morus (Russian Mulberry).....	52	All year	18-24"	2.50
Mitchella (Partridgeberry).....	10	11 Months	Clumps	8.00
Nyssa (Sour Gum).....	36	Sept. to June	6-18"	6.50	3-4 ft.	18.00
Prunus (Wild Black Cherry).....	74	July to Nov.	12-24"	4.50	3-5 ft.	5.00
Prunus (Bird Cherry).....	74	June to Sept.	12-24"	6.50	2½-4 ft.	5.00
Rhus (Smooth Sumac).....	93	All year	12-18"	3.50	3-4 ft.	5.50
Rhus (Shining Sumac).....	93	All year	12-18"	3.50	18-24 in.	5.50
Wild Rose (Rosa Carolina).....	25	All year	8-12"	6.00	2-3 ft.	7.00
Wild Rose (Rosa humilis).....	25	All year	12-15"	6.00	2-3 ft.	6.00
Sassafras.....	18	July to Oct.	12-18"	4.00
Sorbus (European Mt. Ash).....	14	Aug. to Mar.	12-18"	8.25	5-6 ft.	9.00
Sambucus (Common Elder).....	106	Aug. to Nov.	12-18"	3.50	2-3 ft.	4.00
Sambucus Racemosa.....	106	July to Oct.	2-3 ft.	4.50
Symphoricarpus (Coralberry).....	25	11 months	12-18"	2.50	3-4 ft.	5.00
Highbush Blueberry.....	67	June to Sept.	6-12"	12.50	18-24 in.	8.50
Viburnum (Arrowwood).....	28	Oct. to July	12-18"	5.50	3-4 ft.	5.50
Viburnum (Black Haw).....	28	Aug. to Mar. 15	12-18"	15.00	2-3 ft.	9.50
Viburnum (American Cranberry).....	28	11 Months	12-18"	9.50	3-4 ft.	6.50

Never-Again Evergreen Bargains

HERE is a page of large evergreens for hedges and screens and mass plantings which will enable you to plant big trees at the price of small ones. We have the sizes mostly duplicated in Rhode Island, Connecticut and Long Island—so truck deliveries can be arranged at small additional cost. Pick out what you want and write us for delivered prices to your own grounds. The stock is all many times transplanted, balled and burlapped, shapely—no better can be grown. Prices only for quantities of 25 of one kind, or 50 mixed. Smaller quantities slightly higher, write for quotation.

ARBORVITAE (Thuja)—Zone II

American	(Each)
4 to 5 feet.....	\$1.20
5 to 6 feet.....	1.50
Pyramidal	
3 to 4 feet.....	1.20
4 to 5 feet.....	1.50

6 to 7 feet.....	3.50

Mugho dwarf (II)

1¼ to 1½ feet.....	.50
--------------------	-----

AND STILL CHEAPER SIZES

The following stock is smaller and lighter, but fairly bushy. Shipped by express, without earth, roots packed in wet moss—cost about 1½ to 3 cents per plant additional. We have shipped thousands of evergreens in small sizes this way with good results. Orders must call for at least 50 of one kind.

	(Each)
Douglas Fir—1½ to 2 feet XX.....	\$.25
Red Cedar—2 to 3 feet XXX.....	.45
European Larch—2 to 3 feet XXX.....	.27
White Spruce—1½ to 2 feet XXX.....	.10
Norway Spruce—1½ to 2 feet XX.....	.07½
Colorado Spruce—1¼ to 1½ feet XXX.....	.25
Austrian Pine—1½ to 2 feet XX.....	.12½
Red Pine (Norway)—2 to 3 feet XXX.....	.28
Scots Pine—3 to 3½ feet XXX.....	.18
Upright Jap. Yew—1 to 1¼ feet XX.....	.40
Arborvitae	
(American)—2 to 3 feet XXX.....	.27
(Pyramidal)—1 to 1¼ feet X.....	.16
Hemlock—1½ to 2 feet XXX.....	.36
